Joint Commission International Survey Process

The Survey Analysis for Evaluating Risk ® (SAFER™) Matrix is JCI's transformative approach for identifying and communicating risk levels of findings cited during surveys. Adopted from The Joint Commission ®, the SAFER Matrix provides one, comprehensive visual representation of survey findings to help organizations prioritize and focus corrective actions by measuring the likelihood to ...

JCI Accreditation | Joint Commission International

In June, The Joint Commission resumed select on-site surveys and reviews. To determine where on-site activities would resume, The Joint Commission analyzed low-risk areas — by county — to identify organizations waiting to be scheduled for surveys or reviews. Next, account executives made readiness assessment calls to the identified health care organizations to gauge the continued impact of the pandemic on the organization.

Further clarification on resumption of survey and review ...
