Atlas Copco XAS-375 air compressor. Now we all know that "unack" is UNACKNOWLEDGED. But what is the machine referring to by "internal error"? Internal of the control panel? It's a game of musical chairs to remove any faults on the control panel and the machine wont start the start cycle/preheat either.

XAS 375 JD6 "Internal error unack" fault code
The XAS 375 DD6 portable air compressor delivers 392CFM free air delivery and 102psi (g) normal effective working pressure. The XAS range has been specially designed for heavy duty working environments such as the renovation industry (sandblasting) and quarries.

Hello, I have and atlas copco XAS 185 KD7. When air valves are closed tank psi is 125. If I open them gradually and keep tank psi 90 or above everthing is good. Whith the valves wide open tank psi drops to 50 and oil is blowing out of the lines. What do think the possible cause could be. Thanks Gene
